Key Features

Key Features

“ New concept of AC keeps air cool, without unpleasant cold draft ”

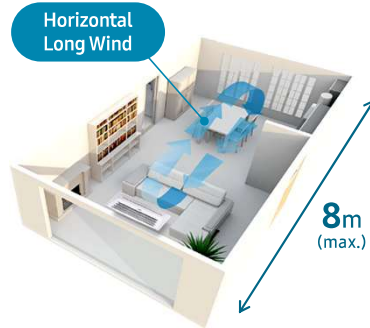

01 Stay cool, but no cold draft
Wind-Free™ Cooling

Wind-Free™ technology keeps the place **cool & comfortable**, without feeling cold draft

※ ASHRAE defines Still-Air as a wind that flows under 0.15m/s, without cold draft

02 Faster cooling in wide area
Big Blade, Long Wind

Wider and bigger blade cools large area much **faster**, without leaving dead zone

※ Base on 7.1kW indoor unit

03 Wind-Free™ Operation
Cost, Energy Saving

Wind-Free™ Cooling allows **efficient energy saving up to 55%**

01. Stay cool, but no cold draft Wind-Free™ Cooling

Fast Cooling, Wind-Free™ Cooling

• Micro holes enable Wind-Free™ Cooling, without cold draft

Can keep the temperature comfortable for more than **8 hours**, and save energy use by **55%**

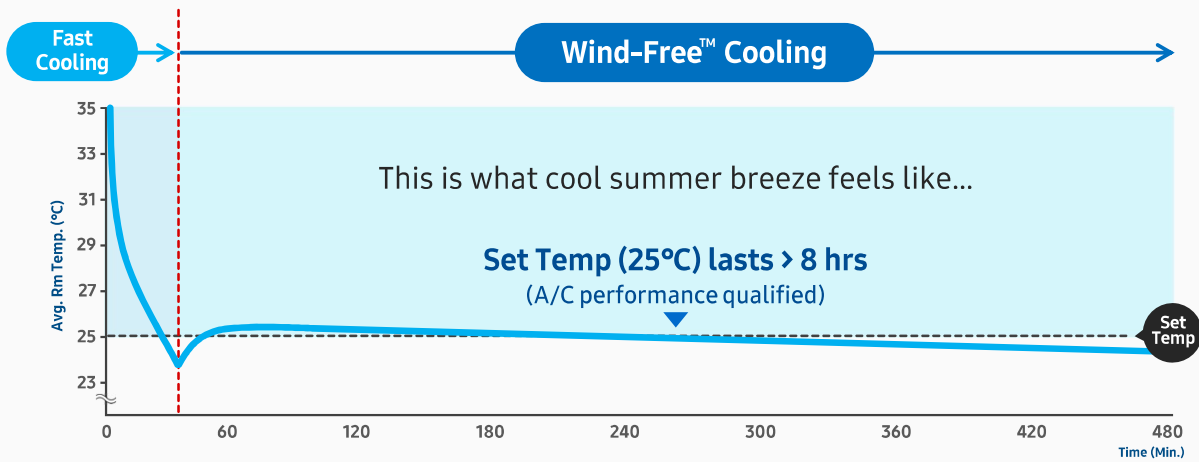

▶ **Fast Cooling, air conditioning becomes faster**

: Wind-Free™ 1 Way Cassette cools the air rapidly and evenly using Big blade

▶ **Wind-Free™ Cooling, air conditioning becomes more comfortable**

: Wind-Free™ Cooling keeps temperature comfortable for more than 8 hours.

Under same condition, can save energy use by 55% compared to conventional cooling

※ Suitable Temperature (Test Standard by SEC) - 7.1kW model, outside temp 35°C (A/C Standard), 39.67㎡ area
※ Electricity Use - ODU (DVM S ECO SHP), IDU (Wind-Free™ 1Way 5.6kW, 3.6kW, 2.2kW simultaneous run).
Cooling Standard (Out: 35°C DB / 24°C WB, In: 27°C DB / 19°C WB).

01. Stay cool, but no cold draft Wind-Free™ Cooling

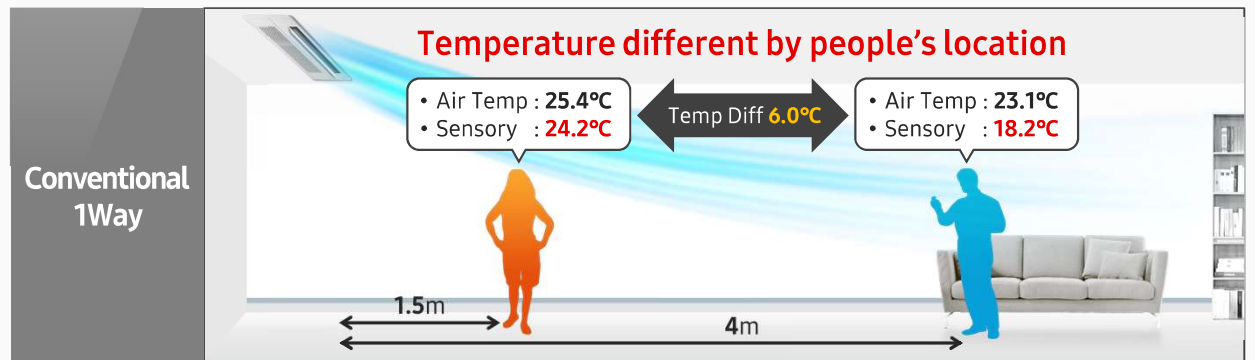

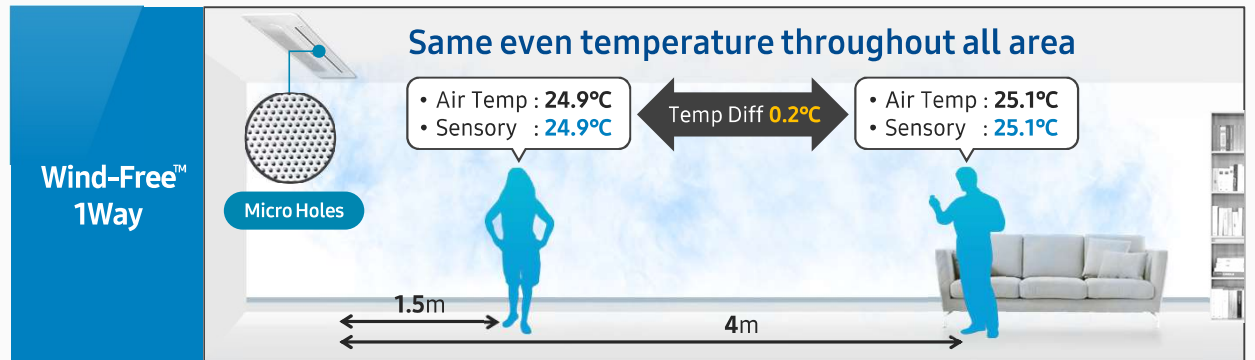

Even Cooling in All Area

- Micro holes enable Wind-Free™ Cooling, without cold draft

Wind-Free™ Cooling keeps the temperature inside **all evenly**

※ ASHRAE defines Still-Air as a wind that flows under 0.15m/s, without cold draft

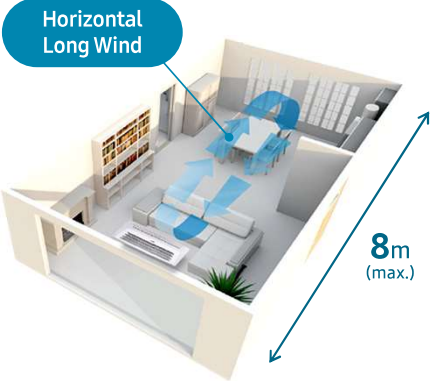

※ Floor Height 1.1m

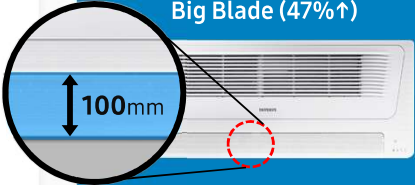

02. Faster cooling in wide area **Big Blade, Long Wind**

Increased Cooling Range

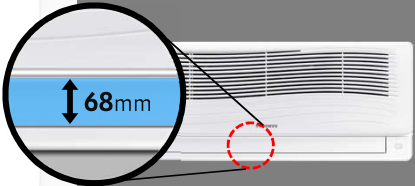

Horizontal Long Wind
8m (max.)

Wind-Free™ 1Way
Big Blade (47%↑)
100mm

Cooling area 8m

Conventional 1Way
68mm

Narrow 5m

- Can deliver cool air up to 8m with wider operating angle, along with rapid and even cooling

※ 8m, range based on 7.1kW large model

※ horizontal wind range : sitting ht. 0.6m, Wind speed 0.3 m/s, 7.1kW model

03. Wind-Free™ Operation Cost, Energy Saving

Energy Saving with Wind-Free™ Operation

COST EFFECTIVE

- Wind-Free™ Cooling allows efficient energy saving up to 55%

※ Test Condition:
- ODU : DVM S ECO 5HP
- IDU : Wind-Free™ 1Way (5.6kW, 3.6kW, 2.2kW)

※ Temperature
- OD 35°C DB / 24°C WB
- ID 27°C DB / 19°C WB

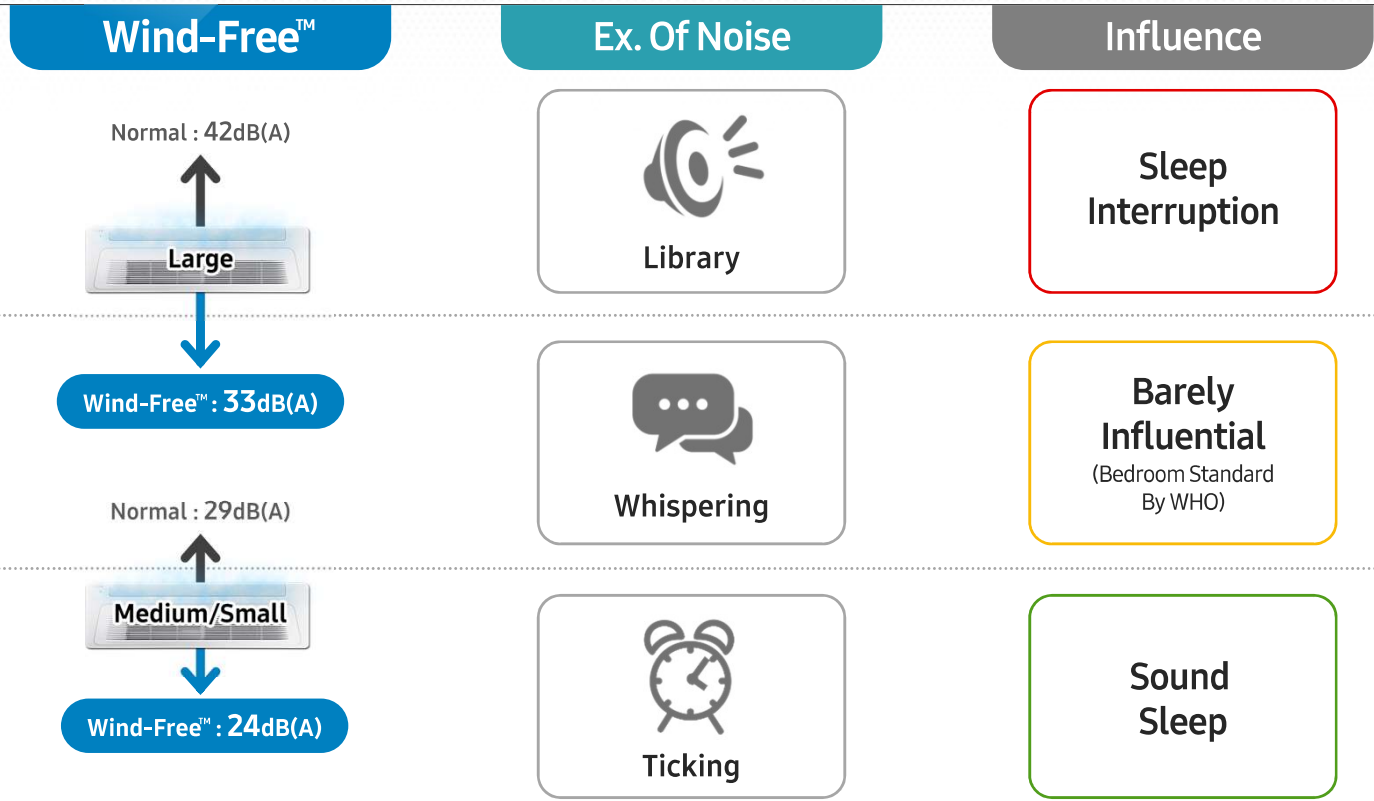

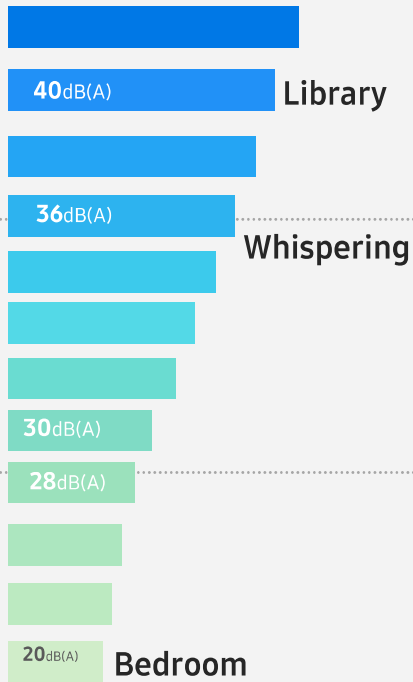

SAMSUNG

02

Benefit of Using Wind-Free™ 1Way Cassette

01. Quiet operation with Wind-Free™

* Large (EU, 5.6~7.1 kW, mainly for living room)
 * Medium/ Small (EU, 1.7~3.6 kW, from bedroom, small area)
 ※ Standard by National Noise Information System

02. Enjoy Cool Summer Night with Wind-Free™

Conventional 1Way

- To feel cold, or to feel hot, that is the question

Cold Draft by direct wind forces you to choose

Only between being **too cold** or **too hot**

Wind-Free™ 1Way Cassette

- Wind-Free™ Cooling gives cool summer night
Enjoy comfortable night with Wind-Free™ Cooling

- Wind-Free™ Cooling cares our babies' health
Comfortable night is for babies as well as parents

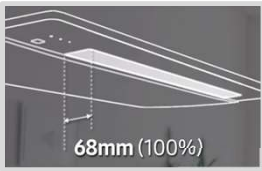

03. Stay Cool Everywhere with Long Wind

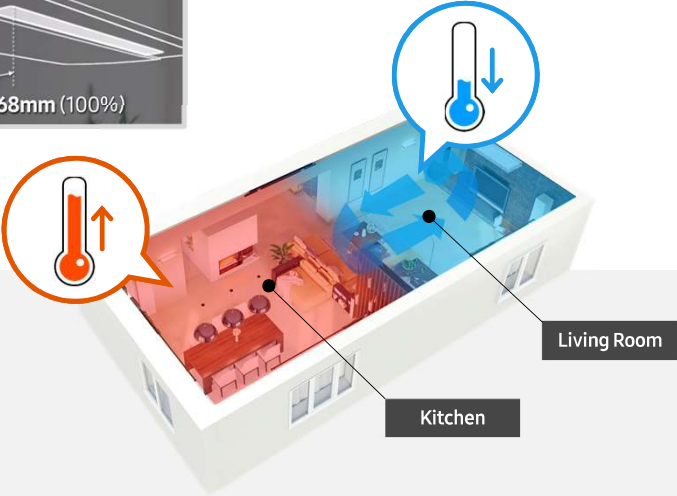

Conventional 1Way

Freezing Living Room, but Sweaty in Kitchen?
Short range of airflow cooling
- uneven **air distribution** and **temperature** by location

68mm (100%)

Living Room
Kitchen

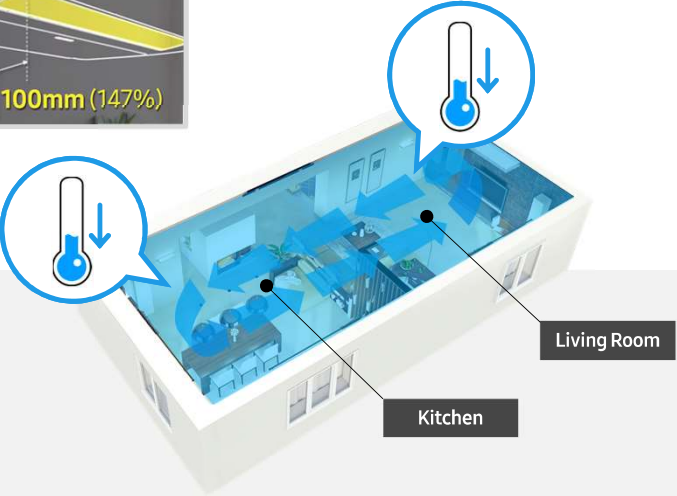

Wind-Free™ 1Way Cassette

With strong long wind from bigger blade
Cool the place all evenly

100mm (147%)

Living Room
Kitchen

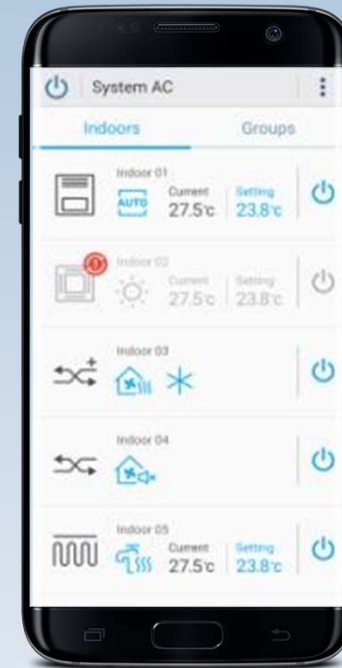

04. 2 Step Cooling Process of Wind-Free™

	1 Step Fast Cooling	2 Step Wind-Free™ COOLING
Features	 <p>Early Stage</p> <p>Big blade cools air Faster and Better</p>	 <p>Wind-Free™</p> <p>No Cold Draft & Save Energy up to 55%</p>
Benefits	 <p>Fast, Powerful Cooling Airflow</p>	 <p>Wind-Free™ Cooling Save Energy up to 55%</p>

05. Use Smartphone to Control from Anywhere (Optional)

Smartphone control, up to 16 In-Door Units

IDU Remote Control

- Power On/Off
- Cooling Mode
- Strength/Direction
- Temp. control, etc.

IDU Monitoring

- Status/Error Check

Group Remote Control

- IDU group setting, edit, & simultaneous control

Scheduled Run Setting

- Preferred temp. /Schedule (Time) /Schedule (Day), etc.

※ Samsung SmartHome App is applicable for Android 4.0 (ICS) and over, and most compatible with Samsung smartphones (Galaxy S / Note series).
※ App supports Apple devices with iOS7 and over.

03

FAQ

01. Does Wind-Free™ Cooling really work?

Yes, it works effectively.

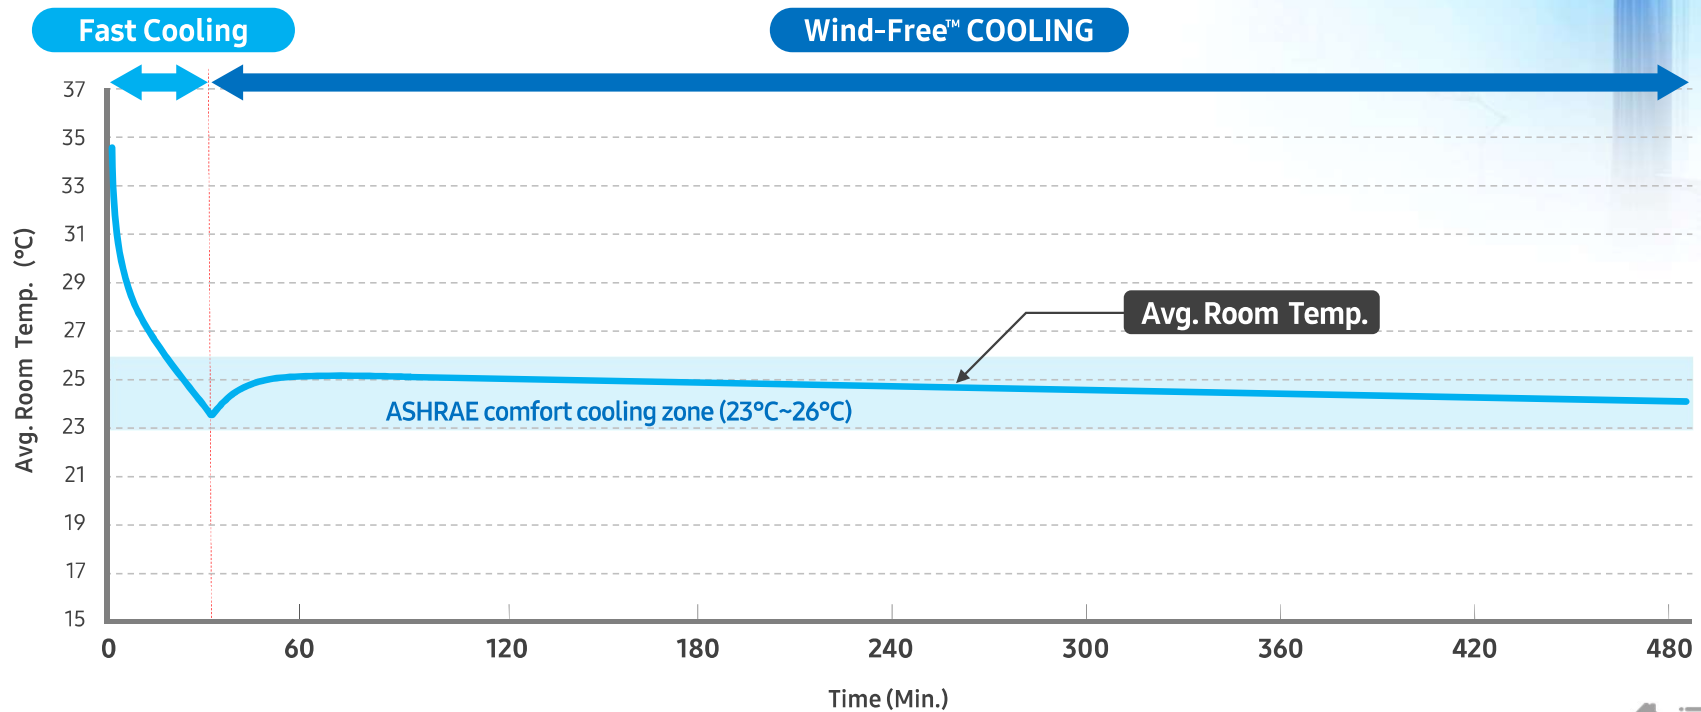

During the early stage of cooling, it uses **Fast Cooling mode, by opening blades and using strong wind**, just like other conventional products.

When indoor temperature is lowered to preferred level and the user would like to **keep the place comfortably cool, using Wind-Free™ Cooling** is highly recommended .

02. When do we use Wind-Free™ Cooling?

- You can activate Wind-Free™ Cooling whenever you press Wind-Free™ button on the controller. Smart Cooling mode cools air quickly and efficiently, with Fast Cooling at first, and automatically switches to Wind-Free™ mode when reaching pre-set room temperature.
- Using while sleeping or studying is highly recommended.

03. Aren't Wind-Free™ and Low airflow setting the same thing?

- ASHRAE defines still-air (or Wind-Free™) as when air drifts under 0.15 m/s. Conventional A/Cs, even with setting as low, can't create drifts under 0.15 m/s with the blade opened. That is what distinguishes between Wind-Free™ and low airflow setting.

04. Does Wind-Free™ A/C smell moldy as other products?

- Every A/C is vulnerable to moldy odor, if moistures remain after cooling and when user don't dry it out. Wind-Free™ A/C has **auto-dry function** on the controller, removes remaining moistures inside after use, and takes out any possibility of having molds in the A/C.

05. Is cleaning Wind-Free™ A/C different to conventional products?

- **You can clean Wind-Free™ A/C the same way** you clean other conventional products. Thanks to micro filtering, micro holes are invulnerable to dusts. Even if becomes dirty, user can easily remove dirt and stains using baby wipe or brush.

06. Isn't the flat surface more vulnerable to stain or discoloration?

- Being smudged and discolored is mainly due to panel structure and static force, attracting dusts. Our flat panel is designed to minimize static force, and consists of UV stabilizer to prevent discoloration.

	Wind-Free™ (Flat)	Conventional (Gloss)
Normal		
When touched or stained	Clean	Fingerprints & stain
When cleaned with Baby wipe	Clean	Still smudged

Wind-Free™ 1Way Credibility Test Result

Subject	Objects Used	Test Condition	Test Standard	Test Result
UV Tolerance	UV Tester	UVC x 15W x 24hr	$\Delta E \geq 3.0$	OK
		UVB x 15W x 24hr		OK
Stain Tolerance	Permanent Marker	Left for 24 hrs and cleaned with Ethanol	No Stain left	OK
	Juice, Food stains, Sauce	Left for 24 hrs and cleaned with Water		OK
	Crayon	Left for 24 hrs and cleaned with Ethanol		OK

07. Is energy actually saved when using Wind-Free™ Cooling?

- Yes, under the same condition, energy consumption amount is **reduced by 55%** when using Wind-Free™ Cooling, compared to conventional cooling.
By using Wind-Free™ Cooling during hot summer night, you can enjoy cool air, extreme quietness, and energy saving at once.

CONVENTIONAL

Wind-Free™ COOLING

Save 55%

Micro Hole

※ Conventional Cooling: Used Wind-Free™ 1WAY Normal Cooling mode

※ Test Condition : ODU : DVM S ECO 5HP / IDU : Wind-Free™ 1Way / 5.6kW, 3.6kW, 2.2kW
※ Temperature : -OD 35°C DB / 24°C WB - ID 27°C DB / 19°C WB

08. How do we know if Wind-Free™ is on when the blade is closed?

- When Wind-Free™ Cooling is activated, **LED would light up** to show that Wind-Free™ is on.
